Announcement

Wolper Jewish Hospital to implement MasterCare for Patient Administration System

Australian Healthcare Software provider Global Health Limited (ASX:GLH) (“Global Health” or “Company”) is pleased to announce that Wolper Jewish Hospital (Wolper) has signed for the implementation of Global Health’s MasterCare Patient Administration System (PAS) for hospitals on a first year value of over \$78,000.

Key Highlights:

- Implementation of MasterCare Patient Administration System (PAS)
- Projected \$78,000 in revenue over first year of the contract

Located in Woollahra, Sydney, **Wolper** is the only not-for-profit Jewish hospital in Australia. Since its official opening in 1961, **Wolper** has become one of Sydney’s leading private hospitals, providing rehabilitation, medical and palliative care of the highest quality to the general community, in a framework of Jewish culture, religious and dietary requirements.

MasterCare PAS is the market leader in Hospital Patient Administration Solutions for Independent and Small Group private hospitals in Australia. The MasterCare PAS solution presents a feature-rich, reliable and scalable solution for the hospitals most important administrative functions.

John Tucker, Wolper Jewish Hospital’s Chief Executive Officer said: “Wolper’s Board, management and staff are excited to implement Mastercare PAS at the hospital. After a wide search for our next PAS, we determined that not only was Mastercare ‘fit for purpose’ for our health facility’s range of services, additional features available now and under development align to our future planning as we transition from paper to electronic records.”

Entering into this Partnership with **Global Health** will provide Wolper the opportunity to evaluate and integrate a number of other Global Health solutions to improve the business of

delivering health such as our [Electronic Medical Record \(EMR\)](#), [Patient Engagement Portal \(Lifecard\)](#) as well as solutions for [Discharge Summaries \(MasterCare+\)](#) and [Secure Message Delivery \(ReferralNet\)](#).

By offering support for client management, billing and claiming, as well as bed management, the company believes it is better aligned to service the independent and small group overnight sector than its large scale multinational competitors.

“Our focus on supporting people living with long-term conditions and connecting their many interventions across healthcare providers has seen MasterCare being increasingly deployed in inpatient rehabilitation facilities. Wolper is yet another prestigious facility we are delighted to be selected as the technology provider for.” said **Mathew Cherian, Global Health’s Managing Director**.

The implementation of MasterCare PAS is scheduled to go-live May 2021. With this to be followed by the implementation of [MasterCare+ for Hospital Discharge Summary](#), Global Health’s next generation cloud based patient management solution, and integration with MyHealthRecord in a subsequent phase.
